

Sodium Iodide - I131 - Injection BP

[Production Information](#) (PI)

Product Code	10018
Indications	Sodium Iodide (131I) is indicated in the treatment of hyperthyroidism and the detection of residual functioning thyroid tissue in differentiated thyroid carcinoma
Specific Activity	≥ 185 TBq/g Iodine at time and date of calibration
pH	7 and 8.5
Radioactive Concentration	200MBq/mL $\pm 10\%$
Radioactive Content	As per customer order $\pm 10\%$ Note: Activity per vial shall be from 200 - 1600 MBq
Radiochemical Purity	$\geq 95\%$ (131I) as Iodide at time of manufacture
Sterility	Product is sterilised by autoclaving
Pack size	200MBq, 800MBq, 16000MBq
Calibration	0900 hours Sydney time Monday
Availability	Monday calibration: Orders by 1pm Thursday for Sunday despatch. Wednesday calibration: 7 days' notice
Expiry	14 days after calibration
Aust R	22800
