

Inactive chemistry and characterisation

A wide range of synthesis, process and characterisation laboratories are available, particularly focused on synthesis and processing of novel materials and subsequent structure property relationships.

Access to these capabilities may be limited to work which includes ANSTO research: please [submit an expression of interest](#) before commencing an Access proposal.

Capability Selections

- General chemistry and processing
- Inactive characterisation
- Inactive XRD.

For further information please contact:

General Chemistry and Processing
Ms Ilkay Chironi
user.office@ansto.gov.au

Inactive Characterisation
Dr Inna Karatchevtseva
user.office@ansto.gov.au

Inactive XRD
Dr Rob Aughterson
user.office@ansto.gov.au
